

Cancellation Policy

Solutions For Industry, Inc takes great pride in providing quick service. Upon receiving a PURCHASE ORDER the process begins to get all information to the factory to start production. The streamlined order process in place with the factory means your order is sent to production and work commences. Shop loading and production schedules mean that materials for the order may be allocated immediately.

Any changes made to the order at this stage may incur a Change Fee, as the job may have to be setup again using the modified design. If the job is cancelled, a Cancellation Fee may be incurred.

The amount of the Change Fee or Cancellation Fee is dependent on how far the job has progressed through the design and production schedule, allowing for actual costs, time and material utilized by the factory.
