

## PROTECTIVE COATINGS

SFI will provide protective coatings for a variety of atmospheres.

The most common that are encountered are

- ◇ Coastal environments
- ◇ Swimming pools
- ◇ Laboratories

After production, the coils are crated and shipped from the coil plant to another company that specializes in coil coatings. Although we will ship to a specific vendor upon request, the coatings that we primarily recommend are

- ◇ E-coat
- ◇ Heresite
